

Training and Development

As part of our service offering we provide **Technical and Implementation Training** to ensure that all the benefits of using our products are realised.

Technical training

Different levels of technical training is provided for miners, artisans and management to ensure optimal use of electronic instruments for blasting, circuit testing and vibration monitoring.

- ✓ Technical specifications of devices
- ✓ Utilisation of devices
- ✓ Regulations that govern the use of devices
- ✓ Safety rules and requirements

Implementation training

We provide support to leaders and managers to implement their strategy, deliver projects and manage the change when switching over to the new AECE systems and products. By making use of the training methods supplied, it becomes safe and easy to setup, test and use the wide range of AECE products and services.

Training Methods

- Training/User Manual
- Training Videos
- Telephonic Contact Sessions
- Person-Person Contact Sessions

Become capable and confident in using the AECE systems and receive an Approved Training Certificate after completion of the required training.
